

Global Equity

Investment Objective

- MSCI All Country World Index ex Australia + 2.5% per annum after all fees and expenses on a rolling five-year basis
- Capital and income growth to exceed MSCI ACWI and inflation
- To achieve lower volatility than the MSCI All Country World Index ex Australia

Investment Firm

Dundas Global Investors ('Dundas') started in 2010 as an independent Investment Management firm based in Edinburgh that manages a single investment strategy, global equities.

Dundas can best be categorised as Defensive Growth, with a focus on companies with strong and sustainable returns on equity and a growing dividend stream.

Key Advantages

- Pro-active management of both components of total return (capital and dividends)
- Fee minimisation and alignment of incentives
- Lower cost base
- Enhanced research that capitalises on technology

Investment Style

Dundas invests for capital and income growth. The team uses fundamental, bottom-up research to find companies capable of real long-term wealth generation that will lead to both capital and dividend growth. While dividends are an important part of the investment proposition, Dundas places greater emphasis on future income streams as opposed to current payout ratios. The resulting portfolio is globally diversified, has an average holding period of more than five years, satisfactory upside and good downside capture statistics.

Characteristics

Unit Price – Class C (NAV)	AUD\$1.5161
Fund Size	AUD\$1,007.41M
Tax Losses Available (As at last distribution period)	AUD\$ 353.76M

Performance and Portfolio Comment – August 2020

Market overview

Measured by the ACWI ex Australia benchmark index in Australian Dollars, global equity markets rose 2.92% in August and now sit only 0.25% lower than the level at the start of 2020. During the month the US Dollar currency index was down a further 1.2%, interest rates (measured by bond yields) rose while gold broke its five-month winning streak and WTI crude oil gained nearly 6% (all expressed in US\$).

North America was the best performing major region rising 4.19% with US equities finishing higher for a fifth straight month and hitting a new record high. Asia Pacific rose 1.96%, with a better performance from its largest market Japan (+4.37%) while China (+2.99%) continued its strong run. Europe lagged but still delivered a positive return (+1.07%) led by Germany (+3.34%) and France (+1.43%) while the UK was largely unchanged (+0.05%) and Switzerland fell (-0.60%).

August was another month with a wide dispersion in sector returns. Consumer Discretionary led the pack with a further gain of 8.83% as businesses leveraged to the economic reopening – retail, airlines, hotels and cruise lines did particularly well. Information Technology (+5.91%) continued its strong performance driven by the US big tech names. Good returns also came from Industrials (+5.05%) and Communication Services (+3.48%), with more modest performance from Materials (+1.59%) and Financials (+1.30%). The worst performer was Utilities, falling 4.63%. Energy (-1.82%) and Real Estate (-1.50%) continued their weak performance run while defensive sectors Health Care (-1.19%) and Consumer Staples (-0.36%) also lagged.

Performance overview

Over the past 12 months, the Fund has delivered a total return gross of fees of 12.94% while the benchmark index gained 6.44%. For the calendar year to date, the Fund returned 5.38% against a benchmark decline of 0.25%. In August the Fund rose 1.25%, a relative performance of -1.67%.

Stock selection was the driver of relative performance with the Fund's I.T. holdings lagging those of the benchmark. Over exposure to Health Care and under exposure to the top performing Consumer Discretionary sector were the other main detractors while good stock selection in Financials and Communications Services plus no Utilities, Energy or Real Estate sector holdings were key contributors. By region, exposure to European markets and stock selection within Europe was the biggest driver of relative performance. Under exposure to strong North American markets and US stock selection also detracted whilst stock selection in Asia Pacific was the key positive.

The top stock performers were led by Norwegian-listed recycling and sorting specialist **Tomra Systems** (+15.10%) which was added to the Fund in January following a review of the waste management industry. Other top contributors were: two Japanese firms; beauty company **Kosé** (+13.38%) and blood diagnostics firm **Sysmex** (+10.07%); and Asian life insurers **AIA Group** (10.47%) and **Prudential** (+9.67%). The biggest detractors were Health Care investments; pharma outsourced manufacturer **Lanza** (-3.44%), clinical diagnostics firm **bioMerieux** (-9.41%) and blood plasma specialist **Grifols** (-9.83%). Other key detractors were chip maker **Taiwan Semiconductor** (-2.58%) and **Apple** (+17.98%), the latter due to its larger benchmark weighting.

Dividends

August saw six new dividend declarations. **Novo Nordisk**, the global leader in diabetes treatments, raised its interim dividend by 8.3%. Also providing shareholders with an increase were Asian life insurer **AIA Group** and consumer products supplier **International Flavors & Fragrances** (IFF). Global drinks giant Diageo maintained its final dividend at last year's level whilst Singaporean lender **DBS Group** cut its quarterly dividend by 40% after the local regulator requested a curb on bank payouts to ensure capital buffers remain ample given the economic uncertainty. Finally, UK-listed **Prudential**, which last year spun-out its asset management business **M&G plc** to shareholders as it focuses on the high growth market for Asian life insurance, announced a new capital allocation policy aligned with this new business strategy and declared a US Dollar denominated interim dividend.

Portfolio changes

There were no full sales or new purchases during the month.
